The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Soukup (GB 2116823) or Evers et al (US 4041186).

Soukup teaches the addition of a mercapto-alkanone to coffee beverages as is claimed (see entire document).

Evers et al teach the addition of mercapto-alkanones to foodstuffs (see entire document, especially claims 1 and 2).

The claims appear to differ as to the recitation of increasing organoleptic properties.

Soukup and Evers et al teach the same components. The increase in organoleptic properties would be no more than inherent and/or obvious to the prior art as the same components are used.

Claims 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Katz et al (US 3773524).

Katz et al teach the addition of mercapto alkanones (e.g. 2-mercapto-pentanone) to foods (see entire document, especially column 1, lines 47-68 and the claims).
